SUMMARY

Results-driven WordPress Developer with 4+ years of experience crafting high-performance, custom websites and plugins for global clients. Expert in bridging robust PHP back-end development with pixel-perfect front-end aesthetics. Proven track record of delivering SEO-optimized, responsive solutions that enhance user experience and drive business growth for digital marketing agencies and SaaS enterprises.

EXPERIENCE

WordPress & Full-Stack Developer

2023 – Present

Independent Contractor / Freelance

- Developed and maintained 15+ custom WordPress websites for international clients, specializing in custom theme and plugin development to meet specific project needs.
- Leveraged page builders like Elementor and WP Bakery to build visually stunning landing pages and complex site layouts, reducing development time by 30%.
- Engineered custom plugins to extend WordPress functionality, implementing complex navigation menus, advanced forms, and interactive features to enrich user experience.
- Optimized website performance through caching, image optimization, and code minification, achieving 90+ scores on Google PageSpeed Insights and ensuring cross-device responsiveness.
- Integrated Google Analytics, Google Tag Manager, and Facebook Ad Pixel to provide clients with actionable data and insights on user behavior and campaign performance.

Full-Stack Developer (Web Applications)

2021 – Present

Fiverr & Independent Clients

- Delivered 20+ high-performance web solutions (including custom WordPress sites) for international clients with a 100% satisfaction rate.
- Implemented RESTful APIs and third-party integrations to connect WordPress sites with external services, streamlining data workflows and automating business processes.
- Provided ongoing website maintenance, including regular core/plugin updates, security hardening, and bug troubleshooting to guarantee site stability and peak performance.
- Ensured cross-browser compatibility (Chrome, Firefox, Safari, Edge) and seamless functionality across all devices.

PROJECTS

Custom WordPress Theme & Plugin Suite

2024

Developed a fully custom WordPress theme and a suite of plugins for a digital marketing agency. Built with PHP and JavaScript, the plugins extended core functionality to manage complex client portfolios and automate reporting. *Stack: WordPress, PHP, JavaScript, Elementor*

A Step Towards Haq – LMS

2025

Architected a production-grade Islamic Learning Management System using a custom WordPress setup. Integrated advanced features like automated certificate issuance, multi-level referral systems, and RTL/Arabic support. *Stack: WordPress, React, Next.js (Headless), Supabase*

FinDash – Financial Dashboard

2024

Built a responsive finance dashboard with detailed analytics and visualizations for a fintech client. Implemented a secure login system and ensured mobile-first responsiveness. *Stack: React, JavaScript, SQL, WordPress REST API*
